Experience

Cubastion Consulting Pvt. Ltd.

Jan 2024 – Present

Associate Consultant

Gurugram, Haryana

- Worked on enterprise HRMS and fintech applications involving **Full-Stack development** and **DevOps practices**.
- Built and supported **Node.js backend services** and **React-based frontend applications**, contributing to onboarding, payroll and transaction workflows.
- Developed **REST APIs** and implemented authentication using **Keycloak & Azure OAuth2** for secure access control.
- Improved application performance and UI responsiveness using **Bootstrap**, **basic SQL query optimization**, and **Memcached caching**.
- Supported **Azure cloud infrastructure** setup across development, QA, and production environments using **Terraform**.
- Containerized applications using **Docker** and deployed them to **Kubernetes clusters (AKS)**, gaining hands-on experience with containerized workloads.
- Worked on **CI/CD pipelines** using **Jenkins** and **GitHub Actions**, integrating Git repositories with **Azure Container Registry (ACR)** and Kubernetes deployments.
- Assisted with cloud cost optimization, security, and production support activities, including reserved instances and basic server maintenance.

Projects

PDF-RAG: AI Chat Assistant for PDFs | *Next.js, LangChain, Qdrant, BullMQ, Docker, Redis, Multer*

- Built a full-stack AI chat application that enables users to upload PDFs and ask context-aware questions powered by **LangChain** and **Google Gemini**.
- Implemented chunking and vector embedding pipelines with LangChain, and integrated **Qdrant Vector DB** for high-performance semantic retrieval.
- Used **BullMQ + Valkey (Redis)** for background job queues to handle large PDF processing asynchronously, and secured uploads via **Multer**.

End-to-End DevOps CI/CD & Kubernetes Deployment | *Docker, Kubernetes, Jenkins, Argo CD, AWS EC2, NGINX*

- Containerized a full-stack application with a **React frontend** and **Node.js backend** using **Docker** and **Docker Compose**, enabling consistent local development and environment parity.
- Implemented a **CI/CD pipeline using Jenkins** to automate GitHub code checkout, Docker image builds, and deployment steps, reducing manual intervention in the release process.
- Deployed and managed containerized applications on **Kubernetes (Minikube)**, working with **Deployments** and **Services** to handle application scaling and internal service communication.

X-CRYPT-O: Crypto Exchange Web App | *React.js, Chakra-UI, API Integration*

Site: <https://x-crypt-o.vercel.app/>

- Built a fully responsive crypto exchange web application that fetches **real-time cryptocurrency data** and allows users to customize price views across multiple coins.
- Implemented **interactive price charts** for multiple time ranges (daily to yearly), focusing on a smooth user experience across devices.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, SQL.

Technologies: ReactJS, NodeJS, ExpressJS, HTML, CSS, Redux Toolkit, Firebase, LangChain, REST APIs, WebSockets.

Databases: MongoDB, MySQL, PostgreSQL, Redis, Vector Databases (Qdrant).

DevOps & Infrastructure: Docker, Docker Compose, Kubernetes (Minikube), Jenkins, Argo CD, GitHub Actions, NGINX, Kubernetes Ingress, CI/CD Pipelines, GitOps, AWS EC2, Linux.

Tools & Libraries: VS Code, Git, GitHub, Postman, Docker CLI, kubectl, Minikube CLI, Jenkins, Argo CD UI, Firebase Console, MongoDB Compass, React DevTools, Redux DevTools, BullMQ, Multer, JWT, bcrypt, Chart.js, D3.js.

Relevant Coursework: Data Structures and Algorithms (C++), Operating Systems, DBMS, Computer Networks.

Education

Chandigarh University

Bachelor of Engineering in Computer Science (GPA: 8.10 / 10.00)

2020-2024

Mohali, Punjab
